

Ayush Kumar Singh

Java Full Stack Developer | Java, Spring Boot & React

+91-9851415373 | ayush449g@gmail.com | linkedin.com/in/ayush-singh45 | github.com/ayush45-code |
ayushsingh45portfolio.vercel.app | Kolkata, India

Summary

Full Stack Developer with 2+ years building production web applications end-to-end on Java / Spring Boot backends and React frontends, for an insurance platform used by 500K+ policyholders. Reduced batch query execution time by 70% and raised unit test coverage from 4% to 70%. Comfortable owning a feature from database schema to REST API to UI, through release.

Professional Experience

Associate Software Engineer – Java Full Stack Developer

Indus Net Technologies, Kolkata

Jun 2024 – Present

Full-Time

- Shipped the Self & Spouse Insurance Policy Module for the SahajBeema platform (with Niva Bupa) end-to-end, by owning backend services, REST API design, integration workflows, and the UI build.
- Delivered a zero-downtime Oracle data migration affecting 5 lakh+ user records, by writing and validating production migration queries for Niva Bupa's master configuration update.
- Prevented a production outage during a third-party insurer (Bajaj) domain migration, by implementing fallback handling for their API endpoints ahead of the cutover.
- Cut batch-processing query execution time by 70% and eliminated recurring deadlocks, by rewriting high-volume Oracle queries using SQL MERGE statements.
- Reduced maintainability issues from 370 to 165 and raised unit test coverage from 4% to 70%, by leading a SonarQube clean-code initiative using JUnit 5 and Mockito.
- Improved eKYC verification reliability for HDFC's secondary policy flow, by migrating the third-party integration from Karza to Surepass without disrupting production.
- Built an interactive insurance admin portal front-to-back, by pairing a React UI with pagination, filtering, and role-based backend permissions across insurer-wise policy and claims dashboards.
- Reduced release friction for the QA team, by owning UAT deployments across both the React frontend and backend services.

Projects

Task Management Full Stack System

github.com/ayush45-code/task-management

Java 17, Spring Boot 3, Spring Security, PostgreSQL, JWT, Spring Data JPA

- Built a scalable full stack application for task lifecycle management, by architecting the Spring Boot 3 service layer on Java 17.
- Secured all API access with role-based permissions, by implementing authentication and authorization using Spring Security and JWT.
- Delivered RESTful APIs covering user, task, and assignment workflows, by designing clean CRUD and business-logic layers for consumption by the client UI.
- Improved data persistence performance, by integrating PostgreSQL with Spring Data JPA and Hibernate.

Personal Portfolio

ayushsingh45portfolio.vercel.app

React, JavaScript, HTML5/CSS3, Vercel (CI/CD)

- Built and shipped a personal portfolio site, by developing the frontend in React with responsive HTML5/CSS3.
- Kept the live site always in sync with the latest code, by setting up continuous deployment on Vercel triggered from GitHub pushes.

Technical Skills

Languages: Java, JavaScript, SQL

Frontend: ReactJS, HTML5, CSS3, JavaScript (ES6+)

Backend: Spring Boot, Spring Security, Spring Data JPA, REST APIs, Microservices

Database: PostgreSQL, Oracle Database, MySQL

Testing: JUnit 5, Mockito, SonarQube, Unit Testing

Tools & Cloud: Git, GitHub, Docker, Postman, Linux, n8n, AWS (EC2, S3, IAM), Vercel

Practices: Agile, Scrum, SOLID Principles, OOP, Design Patterns, Clean Code

Certifications

AWS Academy Graduate – Cloud Foundations

Nov 2023

AWS Academy Graduate – Introduction to Cloud, Semester 1

Oct 2023

AWS Academy Graduate – Introduction to Cloud, Semester 2

Oct 2023

Education

Bachelor of Technology in Computer Science & Engineering

Adamas University, Kolkata

2020 – 2024

CGPA: 8.45 / 10.0
