

Ayush Kumar Singh

Java Backend Developer | Spring Boot Developer | Backend Engineer | Software Engineer

ayush449g@gmail.com | LinkedIn | GitHub | Kolkata, India

Professional Summary

Java Enterprise Application Developer with 2+ years of experience in Java, Spring Boot, Hibernate, REST APIs, Oracle DB, PostgreSQL, JavaScript, HTML5, CSS, and enterprise backend application development. Familiar with Java EE technologies including JSP, Servlets, and MVC-based application architecture.

Professional Experience

Associate Software Engineer - Java Backend

Jun 2024 – Present

Indus Net Technologies, Kolkata

Full-Time

- Delivered production-ready Self & Spouse Insurance Policy Module for SahajBeema platform in partnership with Niva Bupa, owning backend services, REST API development, and integration workflows.
- Developed production-ready Oracle migration queries for batch processing to execute Niva Bupa master configuration updates, ensuring accurate data migration, high-volume transaction reliability, and zero-downtime deployment readiness.
- Implemented fallback mechanisms for third-party Bajaj APIs to handle domain name migration seamlessly, ensuring uninterrupted policy issuance and stable production operations.
- Updated third-party SMS integration for HDFC by migrating eKYC services from Karza to Surepass for secondary policy processing, ensuring seamless verification flow and uninterrupted production operations.
- Optimized Oracle database queries using SQL MERGE statements for high-volume batch processing, reducing execution time by 70%, eliminating deadlocks, and improving real-time transaction consistency in production.
- Led SonarQube clean code quality, reducing maintainability issues from 370 to 165, duplicate code from 2.7% to 1.3%, and increasing unit test coverage from 4% to 70% using JUnit 5 and Mockito, significantly lowering regression risk.
- Developed SQL-driven operational reports that automated manual reporting workflows and improved business decision turnaround time.
- Designed pagination, advanced filtering, and role-based access controls for the insurance admin portal, enabling dashboards for insurer-wise policy flow, claim summaries, and policy reporting across daily, weekly, monthly, and financial year views.

Projects

Task Management Backend System

GitHub Repository

Java 17, Spring Boot, Spring Security, Maven, PostgreSQL, JWT, OAuth 2.0, Spring Data JPA

- Architected a scalable backend system using Java 17 and Spring Boot 3, enabling efficient task management and workflow processing.
- Implemented secure authentication and authorization using Spring Security, JWT, and OAuth 2.0, ensuring protected API access and role-based security.
- Developed robust RESTful APIs for task lifecycle management, user operations, assignments, and complex CRUD workflows.
- Integrated PostgreSQL with Spring Data JPA and Hibernate, optimizing relational data persistence, query performance, and database efficiency.

Technical Skills

Languages: Java, SQL

Frameworks: Spring Boot, Spring Security, Spring Data JPA, JSP, Servlets, Struts, Hibernate

Backend: REST APIs, Microservices, Modular Monolith, API Integration

Database: PostgreSQL, Oracle Database, MySQL

Testing: JUnit 5, Mockito, SonarQube, Unit Testing

Tools: Git, GitHub, Docker, Postman, Linux, CI/CD, n8n

Cloud: AWS (EC2, S3, IAM)

Frontend: HTML5, CSS3, JavaScript, ReactJS

Practices: Agile, Scrum, SOLID Principles, OOP, Design Patterns, Clean Code

Certifications

AWS Academy Graduate - Cloud Foundations

Nov 2023

AWS Academy Graduate - Introduction to Cloud Semester 1

Oct 2023

AWS Academy Graduate - Introduction to Cloud Semester 2

Oct 2023

Education

Bachelor of Technology in Computer Science & Engineering

2020 – 2024

Adamas University, Kolkata

CGPA: 8.45 / 10.0
